A recent survey has been analysing information about the time that people in the UK take off work because of illness. The study was carried $(1) \dots$ in 4,300 businesses around the country. The analysts looked $(2) \dots$ the number of absences, when they took place and the reasons given $(3) \dots$ them. It was found that Manchester was the city where people took most days off- an average of 11 days a year. People were off the least time of all in London (only 7 days $(4) \dots$ average). Employers also claimed that many workers chose to be absent when there was something good $(5) \dots$ television. (6) … most employers thought their employees often did not tell (7) … truth about why they were taking time off. Bosses said that they believed that less than 10% of $(8) \dots$ sick notes they received were genuine.
