

При выполнении заданий с кратким ответом впишите в поле для ответа цифру, которая соответствует номеру правильного ответа, или число, слово, последовательность букв (слов) или цифр. Ответ следует записывать без пробелов и каких-либо дополнительных символов. Так как на экзамене распознавание апострофа в бланках ответов будет затруднено, записывайте ответ в полной форме, например: donotknow, вместо don'tknow.

В заданиях, где нужно установить соответствие между двумя столбцами, ответ запишите в виде сочетания букв и цифр, соблюдая алфавитную последовательность букв левого столбца. Некоторые данные правого столбца могут использоваться несколько раз или не использоваться вообще. Например: A1B1B4Г2.

Если вариант задан учителем, вы можете вписать или загрузить в систему ответы к заданиям с развернутым ответом. Учитель увидит результаты выполнения заданий с кратким ответом и сможет оценить загруженные ответы к заданиям с развернутым ответом. Выставленные учителем баллы отобразятся в вашей статистике.

I had been invited by Jack and his son John to participate in a film they were making about shark diving. I had been diving and writing about the ocean for a decade and had frequently found myself in the water with sharks. Never intentionally. They just appeared, unwanted. The idea of swimming with them seemed dangerous. Still, Jack McKen- ney had asked me to participate. 1) _____

To attract the sharks, we laid out plastic boxes wired together and filled with frozen fish. Once dropped over the side, the boxes lay half in and half out of the water. As the bait thawed, a long line of blood and fish followed us. (2) _____

The stars of the film promised to be blue sharks. Fast and slim-bodied with pointed snouts, they grow to 12 feet in length and are known to attack humans. (3) _____ I thought someone was welcoming our visitors by pounding rapidly on a large bass drum. Then I realised that the fierce pounding was the beating of my own heart.

The shark cage sat on the deck. It was mainly constructed from wire. The idea was to swim into the cage once under the water. The only hand-held weapon I was given was a broom handle.

By the time I got to the cage, five sharks were swimming around us. As they glided past, they seemed curious, and I felt like something hung up in a meat market. (4) _____ Strangely, proximity seemed to calm my fear.

We began to hand-feed the sharks as they cruised by the cage. Several times, I offered a fish, then yanked it away at the crucial moment. Then I felt guilty about teasing the monsters and began to want more contact.

I decided to go outside the cage. (5) _____ "They tend to hit some part of your body that is not moving. Usually this means the head."

Outside the cage and checking in all directions, I moved to where Jack was shooting one particular shark for the film. (6) _____ It put on a slight burst of speed and glided in my direction. I had ten seconds to get my own broom handle in position, and when the shark was a foot away, I hit it firmly, on the snout. The shark twisted away, and disappeared into the depths. Relieved, I realised the mildest show of aggression seemed to put these fellows off their feed.

§ 1. Sometimes the road to romance is long. ‘Lonesome George’, a giant Galapagos tortoise, is the last of his subspecies and thus profoundly alone. Living far out in the Pacific on the island of Pinta in the Galapagos Islands, he is officially the rarest living creature on Earth.

§ 2. No animal better **captures** the history of the Galapagos Islands than the giant tortoise. There used to be thousands of them roaming over these Islands. Observations of them by Charles Darwin even formed part of his world-changing theory of evolution.

§ 3. Sadly, however, mostly because for centuries the passing sailors had been hunting the giant tortoises for food, there are now only an estimated fifteen thousand left in the Galapagos Islands. Of the fifteen known subspecies, four are already thought to be extinct, as was the Pinta giant tortoise until Lonesome George was discovered in 1971. This came as a pleasant surprise to scientists since no other Pinta tortoises had been found on Pinta Island since 1906.

§ 4. Since George was discovered, he has become the star attraction at the Charles Darwin Research Station where conservationists have been hoping to rescue some of his genes by mating him with another tortoise. Two females from the nearby island of Isabela, the most closely related to the Pinta subspecies that could be found, were put into his enclosed territory with him in 1992, but **he failed to take the hint**.

§ 5. Then, Professor Jeffrey Powell, an evolutionary biologist from Yale University, came up with a possible reason why Lonesome George was not finding true romance with the ladies from Isabela. Perhaps, he suggested, they were simply too different to him to be a suitable **match**. Sailors often carried the tortoises from one island to another, he pointed out. So there could be a perfect Pinta match for George alive and well on Isabela or even on some more distant island.

§ 6. To begin testing his theory, Professor Powell compared DNA from seven Pinta tortoises with blood samples from twenty-seven giant tortoises living on Isabela. Among these samples, they found one tortoise with clear signs of Pinta ancestry (происхождение). Sadly, however, the newly discovered tortoise was not suitable for George: he was male.

§ 7. Powell with his team intends to return to Isabela and take blood from more than two thousand tortoises. If they do indeed find a Pinta female, they hope to take her to George’s territory and attempt to breed the pair. The possibility remains, then, that Lonesome George may one day not be so lonely after all.
