

При выполнении заданий с кратким ответом впишите в поле для ответа цифру, которая соответствует номеру правильного ответа, или число, слово, последовательность букв (слов) или цифр. Ответ следует записывать без пробелов и каких-либо дополнительных символов. Так как на экзамене распознавание апострофа в бланках ответов будет затруднено, записывайте ответ в полной форме, например: donotknow, вместо don'tknow.

В заданиях, где нужно установить соответствие между двумя столбцами, ответ запишите в виде сочетания букв и цифр, соблюдая алфавитную последовательность букв левого столбца. Некоторые данные правого столбца могут использоваться несколько раз или не использоваться вообще. Например: A1B1B4Г2.

Если вариант задан учителем, вы можете вписать или загрузить в систему ответы к заданиям с развернутым ответом. Учитель увидит результаты выполнения заданий с кратким ответом и сможет оценить загруженные ответы к заданиям с развернутым ответом. Выставленные учителем баллы отобразятся в вашей статистике.

§ 1. I was struggling to get by. I had just moved to Gloucester from London and had taken the first job that I was offered. I was barely earning enough to do my weekly shopping and I wished I had the money I used to make back in London. As I couldn't afford my own place, I had settled for my best friend's sofa, but the hard cushions and backaches had made me realise that, above all else, I longed for my old flat — my little peaceful place! I soon began to wonder if moving had been the right decision. That's when I heard a radio advert that changed my life...

§ 2. "Looking for your own place but worrying about the cost? Worry no more! You could live free for a year in the 'Enviro-House', one of Britain's first environmentally friendly homes. We're looking for a resident to live rent-free! For more details, visit www..." My friend had heard about this house and he thought that it would be very difficult to stick to an energy conserving routine. I should have considered this, or at least have been **concerned about** how many "guests" would actually pass through. But, as I sat on the painfully uncomfortable sofa, the only thing in my head were the words... "Live free, live free."

§ 3. I visited the website and entered the competition to become an 'eco-housemate'. I was one of three lucky finalists who had to battle it out for a place in the house live on local television. The other finalists were keen environmentalists with a passion for the issue, unlike me. I had never really given it much attention to be honest, as it was **insignificant** to me. I joked with the audience that the only way I was going to learn was if they sent me to the house! They agreed. As I walked through the front door of the house, I had worrying visions of living in a futuristic house, full of high-tech gadgets. I certainly wouldn't have been surprised to see a number of complex-looking machines. However, I was shocked to see the house was completely normal. In fact, it looked just like any other house. This eased my mind a bit, as I rarely find modern technology easy to understand, I prefer the simple life. The heating system, water supply and electricity all worked in exactly the same way as they would in any other house in the UK. The only difference was that the house used renewable sources of energy. Solar panels and small wind turbines were used to provide the hot water and electricity.

§ 4. My experiences in the house made me look at the way I had lived my life in the past and how I should live it in the future. For example, it's neither difficult nor time-consuming to recycle, as long as you make it part of your daily routine. I also changed my perspective on which energy sources to use. It's very simple to make those all-important changes we just need the motivation to make them.

3) the house looked the same as other houses.

§ 1. If you've ever thought that talking to someone was a waste of breath, you might be comforted to know that in some cases you are right — the words we utter have very little effect on people compared with how we say them and what we are doing when we say them.

§ 2. Recent research has shown that in a presentation before a group of people, 55 per cent of the effect on the audience is determined by the body language of the speaker, 38 per cent by their tone of voice and only 7 per cent by the actual content of what is being said. Body language speaks louder than words.

§ 3. So can performance and communication skills really be improved? It would appear so, according to Neuro-Linguistic Programming, or NLP, which was developed in the 1970s by therapist Richard Bandler and linguistics professor John Grinder. They asked: "What makes the difference between someone who is competent at something and someone who is excellent?" They examined the behaviour of people generally considered to be examples of excellence in their respective fields to identify what they were doing consciously (*осознанно*) and unconsciously. Surprisingly, they discovered patterns of communication which all these high achievers were using to produce **consistently** positive results. They found that they were able to copy these strategies and achieve similar success, so they developed a way of teaching these skills to other people, a method they called Neuro-Linguistic Programming.

§ 4. They have discovered how people achieve mutual understanding, both consciously and unconsciously, by observing the body language and voice patterns of the person they are talking to. If you're dealing with someone who is painfully shy, you're not going to make a good connection by overwhelming them with your cheerfulness. By matching someone's behaviour we can gain their **confidence**, achieve a good relationship and improve the quality of communication — in other words, we can get on someone's wavelength. NLP practitioners claim anyone can learn how to do this, and quite quickly. NLP is all about taking one's unconscious, not very highly developed skills and practising them consciously.

§ 5. Another powerful aspect of NLP is its use of positive thinking. We can become aware of the negative and turn it to the positive. Once it is framed in a positive way as a goal, the brain can begin to cope with it and then apply itself to achieving that outcome. To put it another way, if you don't know where you're going, it makes it harder to get there.

14. Прочитайте текст и выберите вариант ответа, соответствующий его содержанию.

What has recent research into the way people speak shown?

- 1) Certain kinds of body language create distrust.      2) A person's tone of voice often does not match what they are saying.  
3) Failure to communicate well has little to do with what you say.

I had been invited by Jack and his son John to participate in a film they were making about shark diving. I had been diving and writing about the ocean for a decade and had frequently found myself in the water with sharks. Never intentionally. They just appeared, unwanted. The idea of swimming with them seemed dangerous. Still, Jack McKenny had asked me to participate. 1)\_\_\_\_\_

To attract the sharks, we laid out plastic boxes wired together and filled with frozen fish. Once dropped over the side, the boxes lay half in and half out of the water: As the bait thawed, a long line of blood and fish followed us. (2)\_\_\_\_\_

The stars of the film promised to be blue sharks. Fast and slim-bodied with pointed snouts, they grow to 12 feet in length and are known to attack humans. (3)\_\_\_\_\_ I thought someone was welcoming our visitors by pounding rapidly on a large bass drum. Then I realised that the fierce pounding was the beating of my own heart.

The shark cage sat on the deck. It was mainly constructed from wire. The idea was to swim into the cage once under the water. The only hand-held weapon I was given was a broom handle.

By the time I got to the cage, five sharks were swimming around us. As they glided past, they seemed curious, and I felt like something hung up in a meat market. (4)\_\_\_\_\_ Strangely, proximity seemed to calm my fear.

We began to hand-feed the sharks as they cruised by the cage. Several times, I offered a fish, then yanked it away at the crucial moment. Then I felt guilty about teasing the monsters and began to want more contact.

I decided to go outside the cage. (5)\_\_\_\_\_ "They tend to hit some part of your body that is not moving. Usually this means the head."

Outside the cage and checking in all directions, I moved to where Jack was shooting one particular shark for the film. (6)\_\_\_\_\_ It put on a slight burst of speed and glided in my direction. I had ten seconds to get my own broom handle in position, and when the shark was a foot away, I hit it firmly, on the snout. The shark twisted away, and disappeared into the depths. Relieved, I realised the mildest show of aggression seemed to put these fellows off their feed.
